### **Agenda**

#### I. LANDSCAPE LEVEL FUNCTIONAL WETLANDS ASSESSMENT

*Presentation by Rob Zbiciak and Chad Fizzell  
Land and Water Management Division  
Department of Environmental Quality*

*The DEQ Landscape Level Wetland Functional Assessment (LLWFA) effort is intended to assist watershed planning groups with prioritizing wetland preservation/restoration activities, based on ecological function. The LLWFA classifies wetlands by their position in the landscape, their geologic landform, and their interaction with surface water in an attempt to reach logical conclusions about a wetlands ecological service within the context of the watershed.*

#### II. SEPTIC TANK PRIORITY INVENTORY-*Beth McDonald*

#### III. WATERSHED UPDATES

- a. *Status of conservation priority mapping project*
- b. *Harmful algal bloom monitoring program this summer*
- c. *Agricultural survey*

#### IV. SCHEDULE NEXT MEETING FOR JULY
