

2017 Commute Challenge

Teams participating in the Commute Challenge will record miles Monday through Friday. Turn in total miles by Noon on Friday, May 19, 2017. Winners will be announced through local newspaper & radio!!

An online registration has been developed for the Commute Challenge (please see Green Commute Registration tab on our website: www.the-macc.org/green-commute). Each person competing in the Commute Challenge may now log their daily miles and indicate their mode of transportation. If an employer prefers to turn in team results at the end of the week, they may provide a list or spreadsheet with names of participants on the Commute Challenge team. This can be sent by email to GreenCommute@the-macc.org or sent by Fax: (616) 395 – 9411.

We will need the following information by Noon on **Friday, May 19, 2017**:

- List of participants (full and part time employees are eligible)
- Days of the week each employee participated
- Mode of transportation (bike, walk, carpool or vanpool, public transportation)
- Total commute miles

This information will be used to determine the score (see box below). Total commute miles will be used to determine air quality benefits, fuel savings, and may also be used as a tie-breaker. We will be comparing scores to determine the Commute Challenge winners in several different categories – based on employer size:

Mini (2 – 10 employees)

Small (11 - 50 employees)

Medium (51 - 150 employees)

Large (150 + employees)

$\frac{\text{Total Green Commuters}}{\text{Total Employees at work}} = \text{Green Commute } \%$
